PROFILE

Fullstack developer with three years of experience, stronger on the frontend. At Bank Artha Graha Internasional I build internal web applications with Laravel, FilamentPHP, Vue, and Next.js, and develop core banking APIs on Axway. On the side I freelance for Asititech Digital Indonesia, mostly a React POS frontend and a Laravel/Filament app.

EXPERIENCE

IT Developer (Web Application), Bank Artha Graha Internasional

11/2024 – Present
Jakarta

- **Stack:** Laravel, FilamentPHP, Inertia.js, Vue 3, Next.js, Axway, PostgreSQL, MySQL
- Build internal web applications for different teams at the bank, mostly with Laravel and FilamentPHP.
- One of them tracks credit documents across branches, with filters, datatables, and export.
- Others are admin panels with role and permission management (RBAC) and Excel import/export.
- Wrote the frontend of the internal web app for the IT development and PMO teams in Next.js. The backend is planned in Golang and handled separately.
- Built the frontend foundation of the internal developer portal for API services: Laravel, Inertia.js, Vue 3, and a Filament admin panel.
- Develop APIs on Axway for core banking operations.
- Help migrate data from core banking and other sources into new applications.
- Test applications (unit, integration, system, UAT) and ATM cases together with IT Support.

Freelance Fullstack Developer, Asititech Digital Indonesia

11/2025 – Present
Jakarta

- **Stack:** React.js, Laravel, FilamentPHP, PHP
- Built Wayback, a Laravel/FilamentPHP app that downloads archived sites from the Wayback Machine. Downloads run in a card-based multi-queue UI, each member only sees their own data, and the saved HTML has the Wayback toolbar removed and internal links rewritten to local paths.
- Migrated the Wayback database to the new schema with re-runnable seeders.
- Build the React.js frontend of a POS application that talks to a Golang backend over a JSON API.
- Built the company landing page in native PHP (astpay.site).

Fullstack Developer, PT. Koding Teknologi Asia (Udacity)

08/2023 – 08/2024
Batam

- Built web applications for a client project with COEDEV (Malaysia) using Laravel, Tailwind CSS, Bootstrap, and AJAX-driven frontends.
- Wrote REST APIs following a Repository-Service pattern.

Fullstack NodeJS Bootcamp, PT. Akasia Code Digital (Code X Academy)

12/2022 – 03/2023
Jakarta

- Built a hotel management web app in a team from an ERD and a business requirements document: Express/NestJS REST API, React.js/Next.js frontend, PostgreSQL, Tailwind CSS, TypeScript.

Frontend Developer Intern, Coding Collective

08/2021 – 12/2021
Yogyakarta

- Built the company blog and article site with the team, turning Figma designs into Bootstrap/PHP pages. First exposure to Laravel (version 6).

EDUCATION

Bachelor of Applied Computer Science (S.Tr.Kom.), Politeknik Negeri Padang

09/2018 – 09/2022
Padang

- D4 Software Engineering Technology, Department of Information Technology. GPA 3.38/4.00.
- Thesis: K-Medoids clustering of high school students in Padang City. QA on the CekFilm mobile project.

SKILLS

Backend: PHP, Laravel, FilamentPHP, Inertia.js, NestJS, Express, REST API, Spatie Permission

Frontend: React.js, Next.js, Vue.js, TypeScript, JavaScript, Tailwind CSS, Bootstrap, Ant Design, Redux

Database: PostgreSQL, MySQL

Tools: Git, Postman, Insomnia, Figma, SSH, Docker (basic)
